

# STEREORAIL

## PERFORMANCE

Power	24V	(15-35V)
Speed	2m	
Truss	7m	
Track	4.5m	

## APPLICATIONS

Suitable for studio work  
Can be used as a modelmover  
Able to mount almost everywhere combined with truss-elements

## BENEFITS

Able to handle motion control and extreme close-ups in confined space  
Lightweight, easily transport (even by plane)  
Buildup in no time and quickly ready for use  
Maximum precision and repetition capability

## MAIN FEATURES

Carbon fibre rail-construction  
Various buildup opportunities (horizontal, vertical, diagonal)  
Rail can be mounted on one tower or on two smaller ones with rail in between

## POWER SUPPLY

Power requirements: 220V, single phase  
Maximum motor power: 35V 8A per channel

## WEIGHT

Base	20 kg
Truss	52 kg
Track	51 kg
Max. camera weight	35 kg
